

## libratu can:

- organise your membership list
- store your toy inventory (with pictures)
- manage your loans
- automate your roster
- generate reports and charts
- speed up your toy library operations

System Requirements: Windows/Mac/Linux computer with Java 1.6 (freely available).

## libratu Online can:

- give your toy library a web presence with minimal effort
- allow your members to interact with your database (view and edit their details, browse toys, renew loans, place holds)
- automatically email your members (roster reminders, overdue toys, notices)
- and more...

Requirements: Internet connection before and after session (dial-up is fine).

Available for free  
download at

libratu Online is an interactive website hosted and maintained by us and ready to be used by you and your members.

libratu Online is an optional service costing from \$50/year (for libraries with up to 50 members).

Once registered your libratu database is automatically synchronised with the libratu Online server at the start and end of every session - so you do not need to be connected to the internet during a session.

We care about the privacy of your data and will not disclose it to any other organisations.

libratu is a completely free and fully featured management system for toy libraries. No other software is required to run libratu

libratu and libratu Online are being actively developed. If they don't do exactly what you want now please contact us and we may be able to add it.
